

Cannes Le 18/04/2009

I the undersigned Mr GIAIME JEAN Director of the company Aircraft Cleaning Service have been using the Permanon Aircraft range of products for over 2 years.

Super-yacht helicopters that come to my company for cleaning no longer have corrosion problems from marine salt since they are regularly treated with Permanon Supershine coatings. This coating also allows for all traces of salt and insects etc. to be very easily removed with damp micro-fibre cloths. And leaves a perfect brilliant finish.

I am very satisfied by the cleaning qualities of these products and the finish they leave on helicopters and private jets.

Yours faithfully,

MR GIAIME JEAN
